The Need?

Insert your org need here...

The Process

1. Determine some Benchmarks
2. Define the Tech Culture/Philosophy
3. Utilize Resources to Create Buzz
4. Design Training and Development Options
5. Implement
6. Gauge the Success

Where to start?

NewlineEducation

Digital Education Impact Planning

➔ Determine a common philosophy for technology in your organization
➔ Put together a plan to create a culture around this philosophy
➔ Then have action plans in place to train and educate all within the organization to make the culture present in day to day operations.

Where to start?
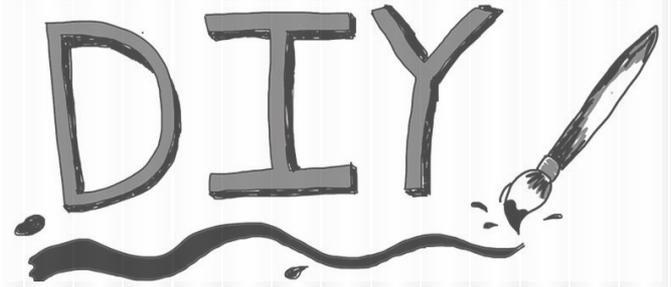

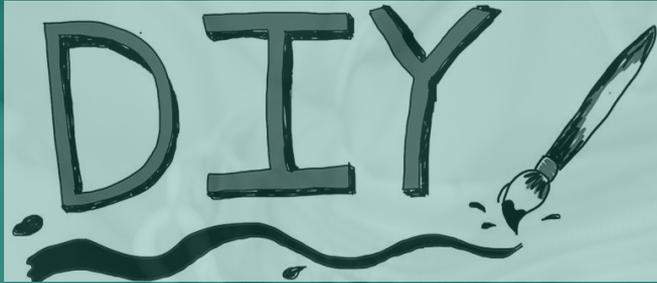

**Getting Benchmarks for your organization:**

Google Form to distribute

Google Apps competencies
(Gmail, Calendar, Classroom, Drive, etc.)

Specific other Apps in your org
(SmartBoards, Mobile Devices, etc.)

It's a Google Form, so you can customize it!

It's important to also make sure your organizations technology culture and philosophy are considered as well as any current training or PD already offered for technology.
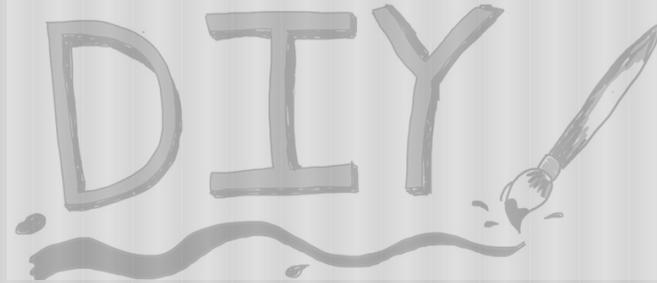

Be sure that things are all in line...

After determining the target areas of training needed,
coming up with a philosophy of technology for your organization,
and identifying the training/PD that may already be in place...
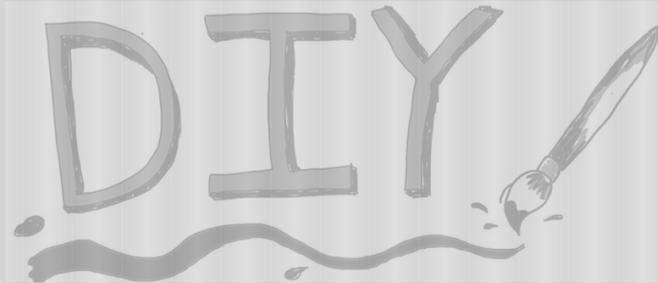

Design some effective training options.

Utilize your organizations resources!

Teacher Coaches

Technology Teachers

Student Led Projects

Technology Literacy Teacher

Google for Education Reference Docs

Who is going to help?

Understand, you must have options...

- **Tutorial Videos to then figure out**
- **Peer to Peer teaching and learning**
- **Detailed docs of instructions**
- **Professional training sessions**

A REPORT ON

HOW TEACHERS LIKE TO LEARN THEIR TECH

2014

Newline Education

The Model

We asked How do you learn technology best?

Let me Dream and Create myself

I can do it Myself with some Videos and a bit of Direction

I learn Best from my Peers

I need a Curriculum or a Plan to follow

I want to Learn from a Professional

Learn more at http://newline.education

HERE ARE THE RESULTS

20—20—20—20—20

It turns out: learners are nearly evenly distributed in their preferred mode of learning... almost a perfect 20% selection rate in each category!

Over 1000 teachers responded
Here is how is played out...

Dreamer Videos Peers Plan Pro

THE BOTTOM LINE

Students all learn in different ways
So do teachers...
treat them that way!

OmniFocused (™) Training
provide varied types of professional development... or you will leave people behind.

Training Portals and Documents

➔ **Comprehensive Reference Document for Google Apps**

➔ **Example Training Portal Designed by a School District**

➔ **Google For Education Teacher Center Training**
   ● **Google for Education additional training resources**

➔ **Make it Real and Practical: NewLine Integration Document**

A step back look at the Process

BENCHMARKS	CULTURE	RESOURCES	TRAINING	IMPLEMENT	BENCHMARKS
Use survey to gather data on what needs you organization has	Determine what culture or philosophy for technology is to be for your org	Determine the resources in your organization that will create the training options	Create those documents, videos, portals, and educational materials for educating others	Initiate the delivery of the training materials and make sure worked in are opportunities to utilize them	Use survey to take snapshots in the progress of your training implementation
The Google Form!		Recruit some Help!	What works for your org; give them options!		Use that Google Form again!

Not really coming up with options or feel overwhelmed at this point?

NewLine Education is a resource to utilize in helping you come up with a plan for Google training and PD in your organization. They even provide services to take you through the entire process.

If your organization is unable to utilize this service but the need is still there and you're interested in coming up with a solution, utilize these materials and give it shot!
