

Can Chromebooks, iPads, and MacBooks Coexist? How we make it work at PDY

Derek Friess
CJ Richardson

MDM

- Choose and MDM that works for you
- Most MDMs have the same functionality
- Don't just look at price
- Check compatibility

Canvas

For us, the answer was Canvas

Go Back to School!

- **Talk to teachers!**
 - **Listen to them as well!**
- Find an LMS that works for you and your system
- Again, price or cost can be a factor, but don't make it the *only* factor

Provide PD and Training

- Teachers may resist
- They may not show up
- Provide it anyway, to anyone that will listen!
- Word will spread
- Be ready to show it more than once
 - What will be your delivery method for that?

Expedite your own processes

We have recovery methods for all devices to quickly get them setup

Apple DEP

Communication

- This can be very overlooked because we already know all of the information

Strong-Reliable Network

Nothing is more frustrating than when things don't work before they even start!

Know the testing platform inside and out!

This is a point of stress- know it.

If you don't know it- FAKE IT!

Confidence must be had here!
